Dynamic Ad Hoc
Reports

Overview

- There are two types of Reports included current in the product:
 - Service quality reports
 - Availability reports
- Reports are generated weekly, Sunday nights at Midnight
- The Unread filter on the Reports page will display only unread reports
- You can share reports with anyone. Just type an email address and click Send.
 - When you share a report with a non-Dynatrace user, the user receives a message with a private link that allows them to view your report without logging into Dynatrace
