# Overview

---

# Overview

- The “Deployment Status” page is used to track:
  - Connected Hosts with agents installed
  - Connected Hosts with Environment ActiveGates installed
- It also includes links to the Agent install and the Environment ActiveGate install pages
- As you install new agents and AG, you can use this page to make sure the correct firewall ports have been opened and the components can connect to the Cluster

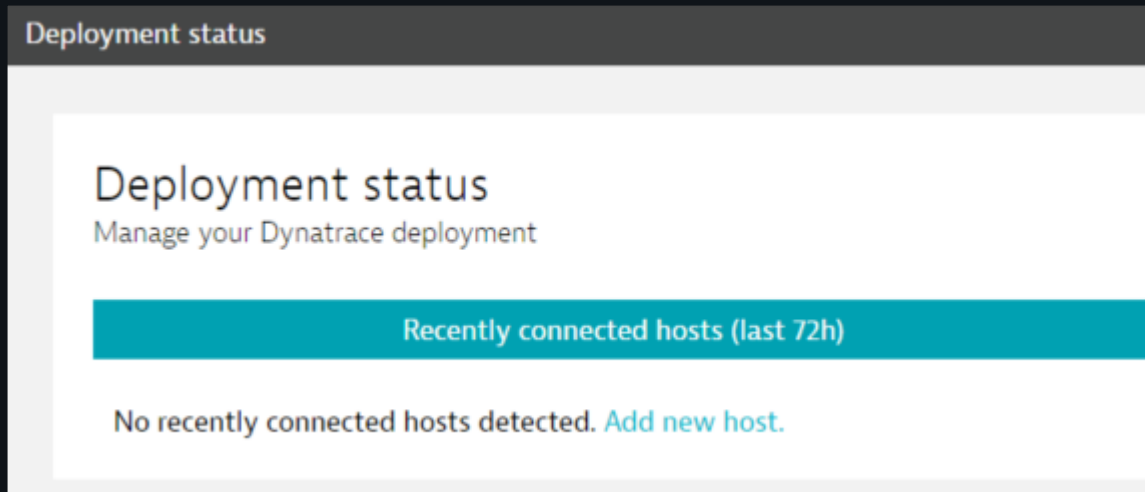

# Connected Hosts

---

## Recently connected Hosts
