Settings – Monitoring

Dynatrace Training Module

Agenda

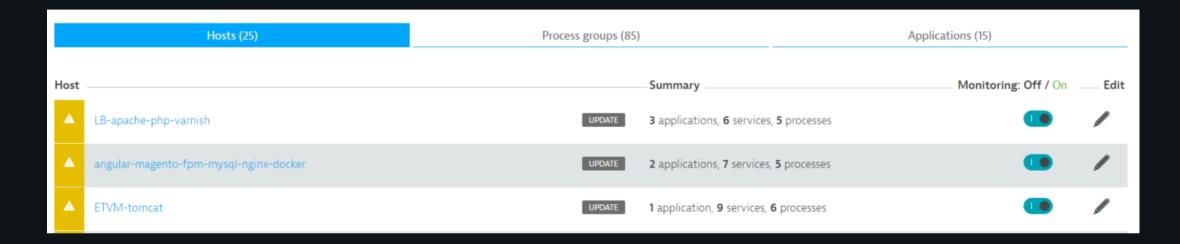

- The Monitoring Overview screen is used to:
 - Provide links to install agents, Environment ActiveGates, RUM, and mobile monitoring
 - Configure monitoring at the host level
 - Edit host settings
 - Configure monitoring at the process group level
 - Edit process group settings
 - Configure monitoring at the application level
 - Edit application settings

Hosts

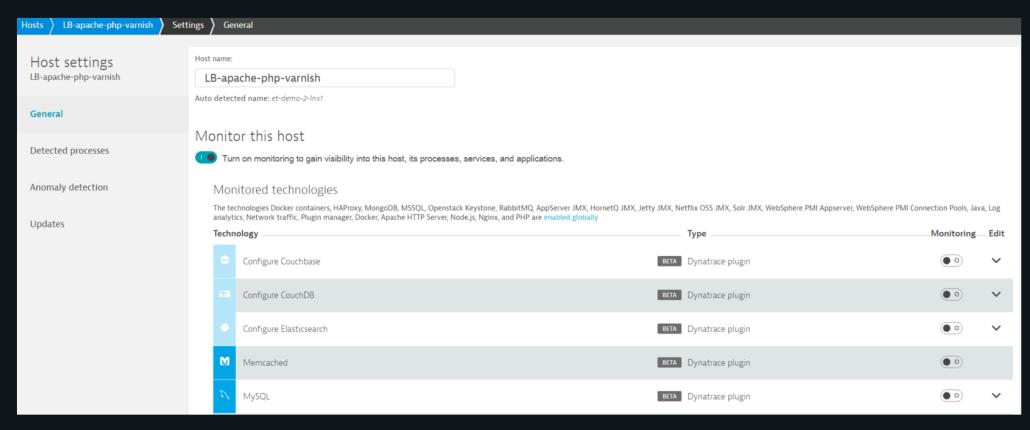

Host

- View a list of all Hosts with an agent installed and running
- Turn on/off monitoring at the host level
- Drill into the Host settings

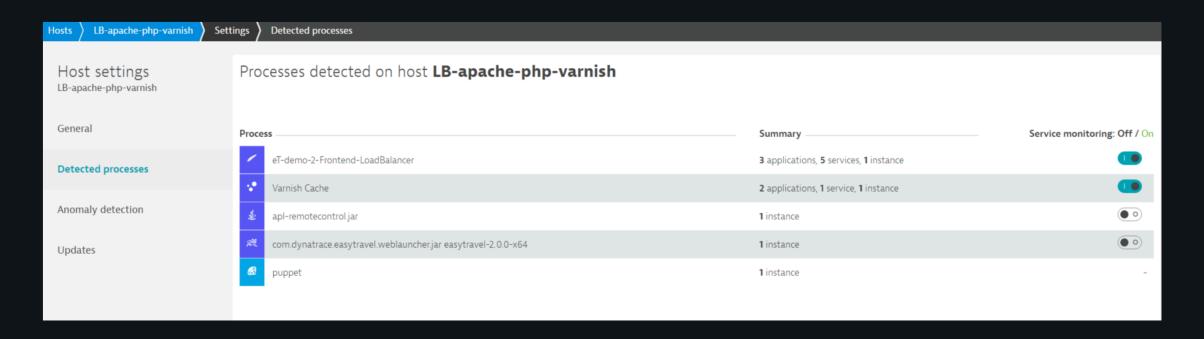

Host - General

- Edit the name of the host
- Override global settings for Monitored Technologies

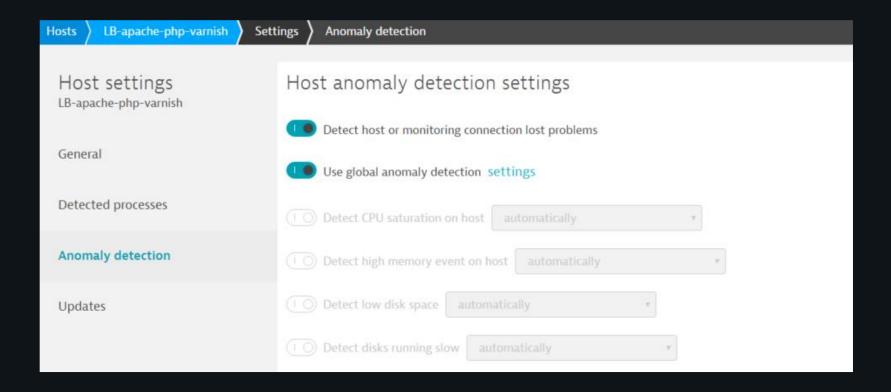

Host – Detected processes

- View detected processes on that host
- Turn on/off Service monitoring for each process

Host – Anomaly detection

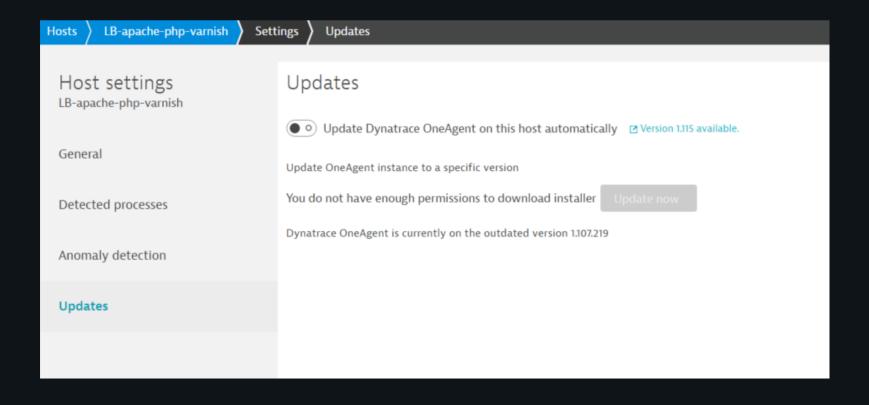

- Turn on/off host connection problems
- Override global settings for Anomaly detection

10

Host – Updates

Update the OneAgent automatically

Process groups

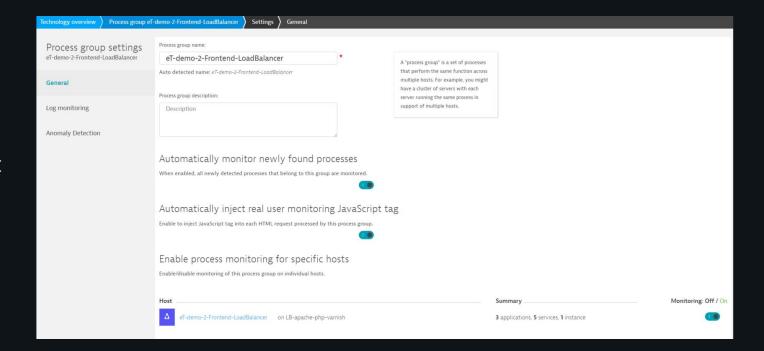

Process Group

- View a list of all Process groups that have been detected
- Turn on/off Service monitoring at the Process group level
- Drill into the Process group settings

	Hosts (25)	Process groups (85)	Applications (15)
Process group		Summary	Service monitoring: Off / On Edit
-	eT-demo-2-Frontend-LoadBalancer	3 applications, 5 services, 1 ins	stance
v	Varnish Cache	2 applications, 1 service, 1 inst	tance /
-	Apache Web Server apache2	1 application, 6 services, 2 inst	tances /
G	nginx	1 application, 5 services, 3 inst	tances
飕	eT-vmware-demo-2-CustomerFrontend	1 application, 2 services, 1 inst	tance

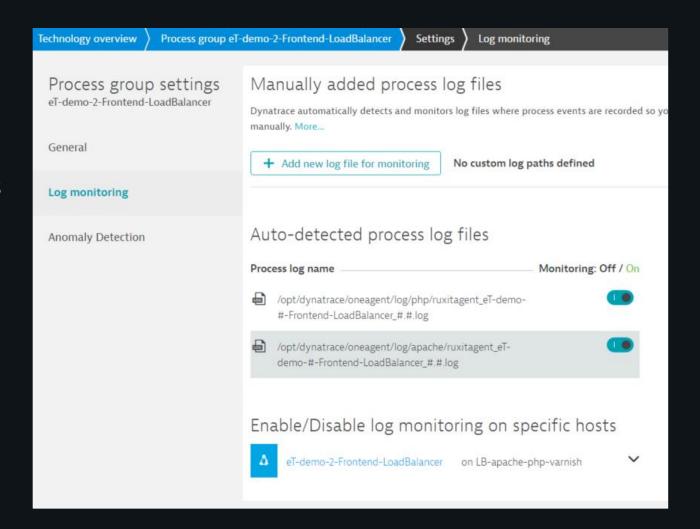

Process Group - General

- Edit the name
- Give it a description
- Turn on/off process monitoring
- Turn on/off RUM injection
- Turn on/off monitoring for a specific host

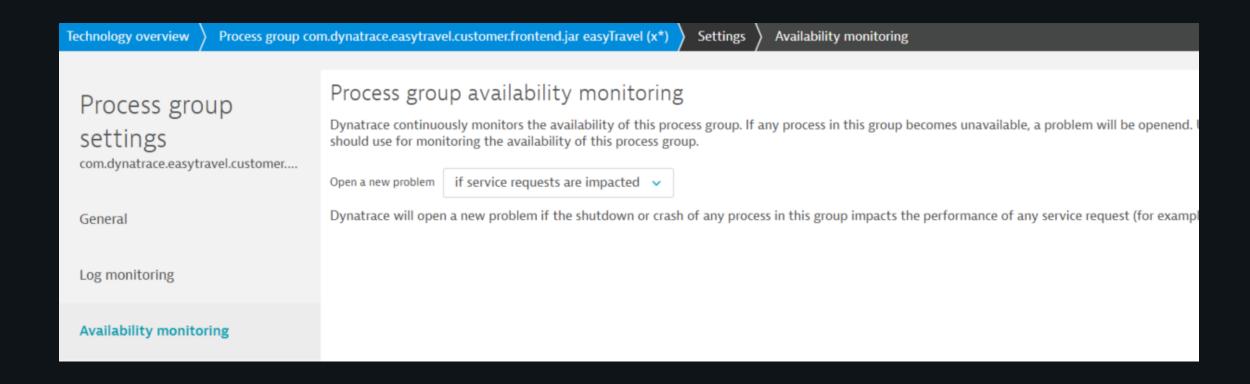

Process Group – Log monitoring

- Manually specify logs to be monitored
- Turn on/off monitoring of automatically detected logs
- Turn on/off log monitoring on specific hosts

Process Group – Anomaly detection

Define how Dynatrace opens an Availability problem

16

Applications

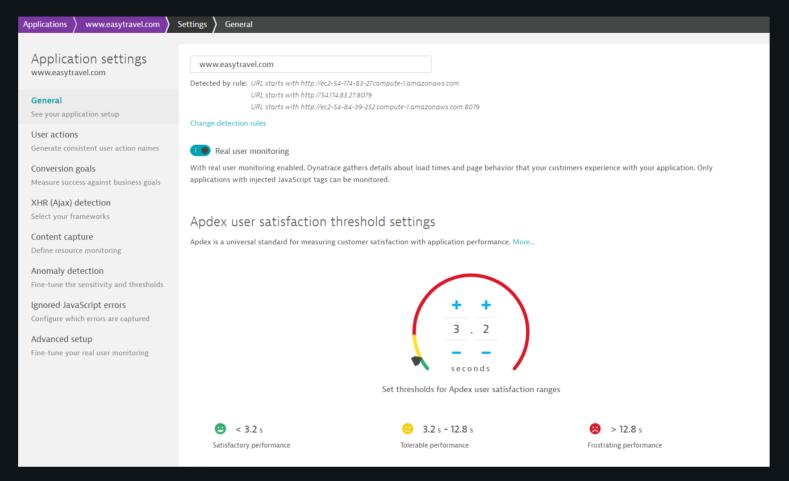

Application

- View a list of all Applications that have been configured
- Turn on/off monitoring at the Application level
- Drill into the Application settings
